

FOR BROKERS & CONSULTANTS

How Prescription Benefit Solutions Works With Brokers

An independent pharmacy bench behind your client relationships. You lead; we do the pharmacy work.

Prescription Benefit Solutions is an independent pharmacy benefits consultancy led by Ginny Crisp, PharmD. We take no PBM revenue, and we work behind brokers and consultants, not around them. When a client of yours needs a deeper pharmacy read, we supply the clinical and contract expertise; the relationship, the framing, and the credit stay with you.

1 Three principles the partnership runs on

You bring us in. Your client hears about us from you, and every deliverable reinforces that you brought the expertise to the table.

We do the pharmacy work. Clinical pharmacists who review hundreds of PBM contracts a year, independent of any PBM relationship or revenue.

You lead the conversation. Findings go through you, in a form you can present. We join client meetings when you want us there, in the role you define.

2 What we do for your clients, through you

PBM contract reviews and audits. The redline agenda before your client signs or renews: definitions, pricing guarantees, rebate language, audit rights, termination provisions.

Pharmacy claims reviews. Where the spend is actually going, mechanic by mechanic: channel pricing, specialty routing, admin fee layers.

PBM RFP support. Independent scoring and contract-language development, so the incumbent's story gets tested against the market.

Renewal-season second opinions. A fast, independent read on renewal terms when the notice window is tight.

3 How a joint engagement starts

Most partnerships begin with a short three-way conversation: you frame the client situation, we bring the pharmacy read, your client hears one story. A typical first engagement is a Contract Review: a 4-6 week engagement producing a written report with audit findings and dollar magnitude per gap, a fiduciary-grade prudent-process record, and a clear recommendation (optimize through amendments, or go to market). You present it with us or ahead of us, your call.

Co-branding: every worksheet in our free Plan Sponsor Toolkit library can carry your logo next to ours for client meetings. The full library is at rxbs.org/toolkit-library; many of our broker partnerships started with a broker running a worksheet with a client.

4 The 2025 record

In 2025, Prescription Benefit Solutions delivered **\$78.7M in contracted savings** across **203 clients** nationally, including **59 PBM RFPs at a 25% savings rate** and **132 pharmacy benefit reviews averaging \$469K in savings per client**. Contracted, not estimated.
